Smart Heating Controls

Heat your home the easy way…

Selecting which part of your home you'd like to heat should be easy. It should be a breeze to switch on the hot water, just the hot water. Advanced, but easy-to-use, timed programming should be a simple task, not a chore.

Better still, this advanced level of control will save you money too! Talk to us today to see how we can bring your home into the 21st century with our superb range of **smart heating controls**.

Superior control of your home's heating

Split your home into functional "zones". For example, a zone for living, a zone for sleeping & a zone for hot water. Or as many zones as you like...Each zone is controlled individually with the utmost of ease. After all, you don't want heat in the bedrooms when you're having your dinner & you don't want hot water when you're in bed. So, upgrade today and take control of your heating system and your bills. And we can offer all this, even for your existing home.

Control from anywhere!

Using our smart heating controls with remote access, we can provide you with full control of your whole heating system via your Smartphone or PC, meaning you can control your home's heating system from anywhere.

No more coming home to a cold house. Switch on the heating before you leave work, the gym or wherever. Some smart controls can even recognise when you're on the way home and automatically switch on the heat for you!

We can help you to bring your home into the Smart Era and you will reap the benefits and the savings for years and years to come.

Advantages of Smart Heating Controls:

- **Easy control of your home's heating system**
- **Save money by wasting far less energy**
- **Control your home from anywhere, via Smartphone app**
- **Advanced, individual control for each zone of your home**
- **Avail of attractive grants and incentives**

Installation of your Smart Heating Controls is something that we specialise in. Of course every home is different, but our expert technicians will be able to advise on the best cable routes and thermostat positions to make the installation as effective as possible but also as easy and un-intrusive as possible.

As with all our installations, we offer our **exclusive 10 year warranty** on our installation work, giving you complete peace of mind.

More of our heating services:

- **Wood pellet boilers**
- **Wood pellet stoves**
- **Air to water heat pumps**
- **Geothermal heat pumps**
- **Solar hot water**
- **Read more on our website**
