Wood Pellet Stoves

Heating with wood pellet

Enjoy warmth and comfort without the hassle. Push a button, sit back and relax! Wood pellet stoves are fully automatic with minimal work for the user, yet they provide fantastic heat and a beautiful, visual flame and focal point.

Elegant, convenient, clean, environmentally friendly, easy to use and very cheap to run, wood pellet stoves are rapidly becoming a choice heating source for many homeowners.

The fuel: Wood Pellets

Wood pellets are environmentally friendly, extremely clean burning, and cost-effective. Made from wood by-products such as sawdust, wood chips and other wood waste products, wood pellets typically measure 6mm in diameter and are around 20mm long. Wood pellets are conveniently packaged in 10 kg or 15kg bags for easy handling & can be purchased in your local hardware or fuel store.

Main benefits of wood pellet stoves:

- **Self-igniting**
- **Thermostatic control**
- **Timer control**
- **Clean combustion**
- **Highly efficient – up to 98%**
- **Wide range of colours & styles**
- **Carbon neutral - no carbon tax**
- **Minimal ash, dust or cleaning**
- **Remote control as standard**
- **Remote access via Smartphone**

Installation

We offer full, professional installation of all our stoves, along with all relevant flue installation & commissioning of the stove. We service, maintain, carry parts for & offer tech. back-up to all our customers.

We don't cut corners and will ensure that your installation is fit for purpose and safe for you and your family. Furthermore, we offer a **10 (ten) year warranty** on all our installations for your complete peace of mind.

More about pellet stoves

Wood pellet stoves and boilers are the leading alternative to fossil fuels for simple space heating and for central heating and are replacing many solid fuel appliances.

All our wood pellet stoves are manufactured by renowned and proven companies and have been extensively tested and approved to all relevant standards, including TUV.

Stove types include:

- **Air stoves** – heat the room in which the stove is placed only
- **Ductable stoves** – heat is shared with additional rooms via a duct from rear of stove
- **Boiler stoves** – stoves with a boiler for central heating and hot water. Also heats the room
- **Slimline Stoves** – stoves with a slim profile for tight spaces
- **Insert stoves** – stoves that are integrated into the wall and sit flush with the wall

More of our heating services:

- **Wood pellet boilers (plant room)**
- **Air to water heat pumps**
- **Geothermal heat pumps**
- **Solar hot water**
- **Smart heating controls**
